

# Focus Automation

*Your Partner in Industrial Automation Journey ...*

## Application Notes

Hybrid Solar Power  
For Roof Top

## System Features :

- 24 hour power production capacity - More Power every day than solar alone
- Maximizes power output per square foot - Same footprint as a solar panel
- Scalable power generation - Modular design, Scalable to fit your needs
- Mechanical Braking System
- Appropriate for on or off-grid applications
- Minimizes backup battery storage requirements
- The unit is equipped with a failsafe centrifugal Braking system designed to protect the turbines and generators at high wind speeds(beyond18.5m/s)
- Custom Colors Turbines, visually engaging

## Focus Automation Supply :

### Authorized Integrators for WindStream Energy Technologies India Pvt. Ltd.

- Design, Engineering, Supply, Installation/Erection, Testing and commissioning of The system
